INDUSTRIAL AUTOMATION & ROBOTICS

Motivated and skilled Industrial Automation and Robotics Technician with experience in designing, programming, and maintaining advanced industrial systems. Adept at using industry-leading software such as Siemens TiaPortal, Siemens NX, Eplan, LabVIEW, and Cognex. Known for driving efficiency, ensuring quality, and fostering collaboration in cross-functional teams. Seeking challenging opportunities to apply expertise in innovative tech projects.

KEY COMPETENCIES

PLC Programming	Robotics Programming	Problem Solving
Electrical Systems Design	Industrial Automation	Project Management
Preventive Maintenance	Technical Documentation	Team Collaboration

PROFESSIONAL EXPERIENCE

Anelco Electronics Electrician

Sep 2021 - Apr 2024

Developed strong skills in diagnosing and repairing electronic and electrical components. Performed preventive and corrective maintenance, designed and interpreted electrical schematics, and installed various sensor and lighting systems. Calibrated and configured equipment, installed security systems, and configured networks. Contributed effectively to innovative tech projects, ensuring high standards of quality and safety.

INS Lacetania

Sep 2022 - May 2024

Intern (During higher Technician in Industrial Automation and Robotics program)

Gained hands-on experience in electrical, pneumatic, and hydraulic systems. Programmed and maintained advanced programmable systems, industrial robots, and industrial communication systems. Applied safety and risk prevention standards while integrating industrial automation projects.

EDUCATION

Higher Technician in Industrial Automation and Robotics

Institution: INS Lacetania
EQF Level: 5

Technician in Telecommunications Installations

Institution: INS Lacetania
EQF Level: 3

EXTRACURRICULAR ACTIVITIES

Erasmus+ Program Participant

Country: Italy
Developed key professional skills in an international environment, enhanced adaptability, and improved communication and teamwork skills.
